

The **Beyond Sciences Initiative (BSI)** announces:

1st Annual International Remote Conference: Science & Society

23 - 24 January 2016

**Abstract Submissions Close
November 30th, 2015**

Science & Society is an accessible conference providing international scholars an opportunity to present their research and network with colleagues around the globe.

This real-time remote conference will enable high caliber discussions surrounding research and community activities, led by international scholars.

Participating institutes will host their respective conferences, starting at 7AM EST, to be broadcast live by BSI. To establish an accessible platform, BSI is willing to provide funds to support Internet and webinar connections. Links for the live broadcast will be distributed to all registered participants prior to the conference.

Individual institutes should contact **beyondsciencesinitiative@gmail.com** for more information.

Conference Topics:

- **Cancer**
- **Chronic Diseases**
- **Education & Technology**
- **Global Health (Mental Health, Infectious Diseases, Medical Practice, Women's Health)**

Registered participants are invited to submit Abstracts related to these topics spanning basic/fundamental research to translational/clinical work and population health.

In addition, we invite registrants to submit a "BSI Hot Doc" – a 5-15 minute video that either (i) illustrates the social, cultural and political contexts in which you conduct your research and academic activities or (ii) describes how you center values of equity, social justice and community engagement in your work.

Online Registration & Abstract submissions:

www.beyondsciences.org/conference/

Registration and Abstract submission are free of charge.
